Subject: Coronavirus - Important Update

Dear LILA community,

The last 24 hours have seen a significant number of evolutions relating to the implications of COVID-19, locally, nationally, and internationally.

I am reaching out to share information pertaining to our school operations. Please be assured that not only are we monitoring all health-related advice, we are in close collaboration with schools in LA, and on the French and IB networks.

There is currently no known case of COVID-19 in the LILA community, nor is there any directive from health authorities regarding school closures. **LILA will therefore remain open today Thursday March 12th and tomorrow Friday March 13th.**

With this said, I do anticipate that the School may be closed from next week. I am meeting with the Board of Trustees this evening, and will communicate our decision tomorrow morning.

If the School closes next week, I anticipate the following:

- Monday and Tuesday would be faculty and staff days to finalize the implementation of our School Continuity e-learning plan. We also want to provide families with time to reconfigure their schedules and are especially conscious of our many elementary families who will need some time to organize supervision. For these reasons, there would be no learning on Monday and Tuesday.
- Our e-learning plan would commence on Wednesday, March 18, 2020 in both synchronous and asynchronous modes. Details would follow.

I will provide our community with an update tomorrow.

Thank you for your partnership and support in these uncertain times.

Best regards,

Michael Maniska
Head of School
